ELSEVIER

Chemical Physics 265 (2001) 361–370

Chemical Physics

www.elsevier.nl/locate/chemphys

Subject index

Methods and constructs

Theoretical

Computational methods for electronic structure

Computational study of the thermal reaction rate between $S^+(^4S)$ and acetylene, M. Aschi and A. Largo 265 (2001) 251

A new method for assessing similarities among atoms in molecules, J. Martí 265 (2001) 263

The vibrational energy pattern in propyne ($^{12}CH_3^{12}C_2H$), M.I. El Idrissi, J. Liévin, M. Herman, A. Campargue and G. Graner 265 (2001) 273

-CI and valence bond approach

Excited electronic states of CO adsorbed on platinum, R.J. Buenker, H.-P. Liebermann and J.L. Whitten 265 (2001) 1

Quasirelativistic valence ab initio calculation of the potential curves for the Zn–rare gas van der Waals molecules, E. Czuchaj, M. Krośnicki and H. Stoll 265 (2001) 291

-perturbative and many body approaches

Computational study of the thermal reaction rate between $S^+(^4S)$ and acetylene, M. Aschi and A. Largo 265 (2001) 251

Nonadditivity of interaction in $Li(NH_3)_n$ and $Li(NH_3)_n^+$ ($n = 1$–4) clusters, K. Mierzwicki and Z. Latajka 265 (2001) 301

-density functional theory

Theoretical determination of the vibrational absorption and Raman spectra of 3-methylindole and 3-methylindole radicals, S.W. Bunte, G.M. Jensen, K.L. McNesby, D.B. Goodin, C.F. Chabalowski, R.M. Nieminen, S. Suhai and K.J. Jalkanen 265 (2001) 13

A comparison of aqueous solvent models used in the calculation of the Raman and ROA spectra of L-alanine, K.J. Jalkanen, R.M. Nieminen, K. Frimand, J. Bohr, H. Bohr, R.C. Wade, E. Tajkhorshid and S. Suhai 265 (2001) 125

Computational study of the thermal reaction rate between $S^+(^4S)$ and acetylene, M. Aschi and A. Largo 265 (2001) 251

PII: S0301-0104(01)00348-2

Semiempirical methods
Ab initio interpretation of sum frequency generation spectra of 4-cyanopyridine adsorbed on Au(1 1 1), M. Tadjeddine and J.P. Flament 265 (2001) 27

Algebraic approaches
Lie algebraic description of the rotational spectra of linear triatomic molecules: application to CS_2, Q. Meng, D. Guan and S. Ding 265 (2001) 113
Chemistry of vibronic coupling. Part 1: How to maximize vibronic coupling constants in a diabatic harmonic potential model?, W. Grochala, R. Konecny and R. Hoffmann 265 (2001) 153
A new method for assessing similarities among atoms in molecules, J. Martí 265 (2001) 263

Wavefunctions for highly excited and unbound states
Excited electronic states of CO adsorbed on platinum, R.J. Buenker, H.-P. Liebermann and J.L. Whitten 265 (2001) 1

Spin states and magnetic interactions
Photoswitching of the magnetic properties of one-dimensional π-electron systems, F. Dietz and N. Tyutyulkov 265 (2001) 165

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)
Ferrocenyl donor–organic acceptor complexes for second order nonlinear optics, A. Krishnan, S.K. Pal, P. Nandakumar, A.G. Samuelson and P.K. Das 265 (2001) 313

Collisional and reactive molecular dynamics with non-frictional forces
Collisional survival of antiprotonic helium atoms, S. Sauge and P. Valiron 265 (2001) 47

Intramolecular dynamics
The correlation between the phase transitions and vibrational properties by Raman spectroscopy: liquid–solid β and solid β–solid α acetonitrile transitions, H. Abramczyk and K. Paradowska-Moszkowska 265 (2001) 177

Molecular dynamics of many particle systems and condensed phases
A new formalism for molecular dynamics in internal coordinates, S.-H. Lee, K. Palmo and S. Krimm 265 (2001) 63
The correlation between the phase transitions and vibrational properties by Raman spectroscopy: liquid–solid β and solid β–solid α acetonitrile transitions, H. Abramczyk and K. Paradowska-Moszkowska 265 (2001) 177
Molecular simulation of a phase separation in a non-primitive electrolyte solution, L. Degrève, A.C. Borin, F.M. Mazzé and A.L.G. Rodrigues 265 (2001) 193
Study of the N–H···O=C proton transfer reaction in aqueous solution using classical free energy curves, S. Tolosa Arroyo, J.A. Sansón Martín and A. Hidalgo García 265 (2001) 207

Dynamics of structures, lattices and macromolecular conformations
A new formalism for molecular dynamics in internal coordinates, S.-H. Lee, K. Palmo and S. Krimm 265 (2001) 63

The correlation between the phase transitions and vibrational properties by Raman spectroscopy: liquid–solid β and solid β–solid α acetonitrile transitions, H. Abramczyk and K. Paradowska-Moszkowska 265 (2001) 177
Molecular simulation of a phase separation in a non-primitive electrolyte solution, L. Degrève, A.C. Borin, F.M. Mazzé and A.L.G. Rodrigues 265 (2001) 193

Equilibrium statistical mechanics and thermodynamics
Heat capacity and entropy of an equilibrium liquid from T_g to 0 K, and examining the conjectures of an underlying thermodynamic transition, G.P. Johari 265 (2001) 217

Experiment

Molecular spectroscopy
The correlation between the phase transitions and vibrational properties by Raman spectroscopy: liquid–solid β and solid β–solid α acetonitrile transitions, H. Abramczyk and K. Paradowska-Moszkowska 265 (2001) 177
The vibrational energy pattern in propyne ($^{12}CH_3^{12}C_2H$), M.I. El Idrissi, J. Liévin, M. Herman, A. Campargue and G. Graner 265 (2001) 273

-infrared
Theoretical determination of the vibrational absorption and Raman spectra of 3-methylindole and 3-methylindole radicals, S.W. Bunte, G.M. Jensen, K.L. McNesby, D.B. Goodin, C.F. Chabalowski, R.M. Nieminen, S. Suhai and K.J. Jalkanen 265 (2001) 13
Lie algebraic description of the rotational spectra of linear triatomic molecules: application to CS_2, Q. Meng, D. Guan and S. Ding 265 (2001) 113
The CO_2 complexes with HOO and HO in argon matrices, T. Svensson, B. Nelander and G. Karlström 265 (2001) 323

-Raman
Theoretical determination of the vibrational absorption and Raman spectra of 3-methylindole and 3-methylindole radicals, S.W. Bunte, G.M. Jensen, K.L. McNesby, D.B. Goodin, C.F. Chabalowski, R.M. Nieminen, S. Suhai and K.J. Jalkanen 265 (2001) 13
A comparison of aqueous solvent models used in the calculation of the Raman and ROA spectra of L-alanine, K.J. Jalkanen, R.M. Nieminen, K. Frimand, J. Bohr, H. Bohr, R.C. Wade, E. Tajkhorshid and S. Suhai 265 (2001) 125
The correlation between the phase transitions and vibrational properties by Raman spectroscopy: liquid–solid β and solid β–solid α acetonitrile transitions, H. Abramczyk and K. Paradowska-Moszkowska 265 (2001) 177

-UV
Excited-state double-proton transfer of pyrimidines mediated by hydrogen-bonded complexes, M.A. El-Kemary, H.S. El-Gezawy, H.Y. El-Baradie and R.M. Issa 265 (2001) 233

-visible
Spectral broadening and its effect in Stark spectra of carotenoids, S. Krawczyk and D. Olszówka 265 (2001) 335

Multiphoton ionization
Thermalization of low energy electrons in liquid methylcyclohexane studied by the photoassisted ion pair separation technique, L.V. Lukin and A.A. Balakin 265 (2001) 87
Absolute cross-sections for the nonresonant multi-photon ionization of toluene and xylene in the gas phase, C. Walther, A. Herlert, J.I. Kim, F.J. Scherbaum, L. Schweikhard and M. Vogel 265 (2001) 243
Kinetic study of the forward and backward electron transfer between *N,N,N′,N′*-tetramethylbenzidine and CH_2Cl_2 in solid argon leading to a photoequilibrium, A. Langenscheidt, H. Meyer and A. Schweig 265 (2001) 349

X-ray spectroscopy
Empty levels probed by XAS and ETS in cyclic polymethylene sulfides $(CH_2)_nS$, $n = 2, 3, 4, 5$, C. Dezarnaud-Dandine, F. Bournel, C. Mangeney, M. Tronc, A. Modelli and D. Jones 265 (2001) 105

Electron impact spectroscopy
Empty levels probed by XAS and ETS in cyclic polymethylene sulfides $(CH_2)_nS$, $n = 2, 3, 4, 5$, C. Dezarnaud-Dandine, F. Bournel, C. Mangeney, M. Tronc, A. Modelli and D. Jones 265 (2001) 105

Nonlinear optics and spectroscopy
Ferrocenyl donor–organic acceptor complexes for second order nonlinear optics, A. Krishnan, S.K. Pal, P. Nandakumar, A.G. Samuelson and P.K. Das 265 (2001) 313

Light scattering
Ferrocenyl donor–organic acceptor complexes for second order nonlinear optics, A. Krishnan, S.K. Pal, P. Nandakumar, A.G. Samuelson and P.K. Das 265 (2001) 313

Calorimetric methods
Heat capacity and entropy of an equilibrium liquid from T_g to 0 K, and examining the conjectures of an underlying thermodynamic transition, G.P. Johari 265 (2001) 217

Objects

Bulk systems

Liquids neat
Heat capacity and entropy of an equilibrium liquid from T_g to 0 K, and examining the conjectures of an underlying thermodynamic transition, G.P. Johari 265 (2001) 217

Liquid mixtures and solutions
Thermalization of low energy electrons in liquid methylcyclohexane studied by the photoassisted ion pair separation technique, L.V. Lukin and A.A. Balakin 265 (2001) 87
Molecular simulation of a phase separation in a non-primitive electrolyte solution, L. Degrève, A.C. Borin, F.M. Mazzé and A.L.G. Rodrigues 265 (2001) 193

Study of the N–H···O=C proton transfer reaction in aqueous solution using classical free energy curves, S. Tolosa Arroyo, J.A. Sansón Martín and A. Hidalgo García 265 (2001) 207
Ferrocenyl donor–organic acceptor complexes for second order nonlinear optics, A. Krishnan, S.K. Pal, P. Nandakumar, A.G. Samuelson and P.K. Das 265 (2001) 313

Crystals
Chemistry of vibronic coupling. Part 1: How to maximize vibronic coupling constants in a diabatic harmonic potential model?, W. Grochala, R. Konecny and R. Hoffmann 265 (2001) 153

Glasses
Heat capacity and entropy of an equilibrium liquid from T_g to 0 K, and examining the conjectures of an underlying thermodynamic transition, G.P. Johari 265 (2001) 217
Spectral broadening and its effect in Stark spectra of carotenoids, S. Krawczyk and D. Olszówka 265 (2001) 335

Polymers
Photoswitching of the magnetic properties of one-dimensional π-electron systems, F. Dietz and N. Tyutyulkov 265 (2001) 165

Biological systems
Excited-state double-proton transfer of pyrimidines mediated by hydrogen-bonded complexes, M.A. El-Kemary, H.S. El-Gezawy, H.Y. El-Baradie and R.M. Issa 265 (2001) 233

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)
Theoretical determination of the vibrational absorption and Raman spectra of 3-methylindole and 3-methylindole radicals, S.W. Bunte, G.M. Jensen, K.L. McNesby, D.B. Goodin, C.F. Chabalowski, R.M. Nieminen, S. Suhai and K.J. Jalkanen 265 (2001) 13
A new method for assessing similarities among atoms in molecules, J. Martí 265 (2001) 263

Molecules (neutral and ionic)
Chemistry of vibronic coupling. Part 1: How to maximize vibronic coupling constants in a diabatic harmonic potential model?, W. Grochala, R. Konecny and R. Hoffmann 265 (2001) 153
Computational study of the thermal reaction rate between $S^+(^4S)$ and acetylene, M. Aschi and A. Largo 265 (2001) 251

-diatomic
Quasirelativistic valence ab initio calculation of the potential curves for the Zn–rare gas van der Waals molecules, E. Czuchaj, M. Krośnicki and H. Stoll 265 (2001) 291

-small polyatomics
Empty levels probed by XAS and ETS in cyclic polymethylene sulfides $(CH_2)_nS$, $n = 2, 3, 4, 5$, C. Dezarnaud-Dandine, F. Bournel, C. Mangeney, M. Tronc, A. Modelli and D. Jones 265 (2001) 105

Lie algebraic description of the rotational spectra of linear triatomic molecules: application to CS_2, Q. Meng, D. Guan and S. Ding 265 (2001) 113
The vibrational energy pattern in propyne ($^{12}CH_3^{12}C_2H$), M.I. El Idrissi, J. Liévin, M. Herman, A. Campargue and G. Graner 265 (2001) 273

-aromatics
Absolute cross-sections for the nonresonant multi-photon ionization of toluene and xylene in the gas phase, C. Walther, A. Herlert, J.I. Kim, F.J. Scherbaum, L. Schweikhard and M. Vogel 265 (2001) 243

-polymeric and biological
A new formalism for molecular dynamics in internal coordinates, S.-H. Lee, K. Palmo and S. Krimm 265 (2001) 63
Spectral broadening and its effect in Stark spectra of carotenoids, S. Krawczyk and D. Olszówka 265 (2001) 335

Molecular aggregates

-dimers
Excited-state double-proton transfer of pyrimidines mediated by hydrogen-bonded complexes, M.A. El-Kemary, H.S. El-Gezawy, H.Y. El-Baradie and R.M. Issa 265 (2001) 233

-van der Waals molecules
Quasirelativistic valence ab initio calculation of the potential curves for the Zn–rare gas van der Waals molecules, E. Czuchaj, M. Krośnicki and H. Stoll 265 (2001) 291

-clusters
Excited electronic states of CO adsorbed on platinum, R.J. Buenker, H.-P. Liebermann and J.L. Whitten 265 (2001) 1
Ab initio interpretation of sum frequency generation spectra of 4-cyanopyridine adsorbed on Au(1 1 1), M. Tadjeddine and J.P. Flament 265 (2001) 27
Nonadditivity of interaction in $Li(NH_3)_n$ and $Li(NH_3)_n^+$ ($n = 1$–4) clusters, K. Mierzwicki and Z. Latajka 265 (2001) 301

-complexes
Study of the N–H $\cdots$ O=C proton transfer reaction in aqueous solution using classical free energy curves, S. Tolosa Arroyo, J.A. Sansón Martín and A. Hidalgo García 265 (2001) 207
Ferrocenyl donor–organic acceptor complexes for second order nonlinear optics, A. Krishnan, S.K. Pal, P. Nandakumar, A.G. Samuelson and P.K. Das 265 (2001) 313
The CO_2 complexes with HOO and HO in argon matrices, T. Svensson, B. Nelander and G. Karlström 265 (2001) 323

Free radicals (incl. hydronium and muonium)
Collisional survival of antiprotonic helium atoms, S. Sauge and P. Valiron 265 (2001) 47
The CO_2 complexes with HOO and HO in argon matrices, T. Svensson, B. Nelander and G. Karlström 265 (2001) 323

Ions and charge carriers
Thermalization of low energy electrons in liquid methylcyclohexane studied by the photoassisted ion pair separation technique, L.V. Lukin and A.A. Balakin 265 (2001) 87
Kinetic study of the forward and backward electron transfer between *N,N,N′,N′*-tetramethylbenzidine and CH_2Cl_2 in solid argon leading to a photoequilibrium, A. Langenscheidt, H. Meyer and A. Schweig 265 (2001) 349

Supramolecular assemblies (incl. nanoparticles and nanostructures)
Molecular simulation of a phase separation in a non-primitive electrolyte solution, L. Degrève, A.C. Borin, F.M. Mazzé and A.L.G. Rodrigues 265 (2001) 193

Phenomena

Molecular structure
Ab initio interpretation of sum frequency generation spectra of 4-cyanopyridine adsorbed on Au(1 1 1), M. Tadjeddine and J.P. Flament 265 (2001) 27
A comparison of aqueous solvent models used in the calculation of the Raman and ROA spectra of L-alanine, K.J. Jalkanen, R.M. Nieminen, K. Frimand, J. Bohr, H. Bohr, R.C. Wade, E. Tajkhorshid and S. Suhai 265 (2001) 125
A new method for assessing similarities among atoms in molecules, J. Martí 265 (2001) 263
Quasirelativistic valence ab initio calculation of the potential curves for the Zn–rare gas van der Waals molecules, E. Czuchaj, M. Krośnicki and H. Stoll 265 (2001) 291
The CO_2 complexes with HOO and HO in argon matrices, T. Svensson, B. Nelander and G. Karlström 265 (2001) 323

Vibrations and rotations of molecules
Theoretical determination of the vibrational absorption and Raman spectra of 3-methylindole and 3-methylindole radicals, S.W. Bunte, G.M. Jensen, K.L. McNesby, D.B. Goodin, C.F. Chabalowski, R.M. Nieminen, S. Suhai and K.J. Jalkanen 265 (2001) 13
Ab initio interpretation of sum frequency generation spectra of 4-cyanopyridine adsorbed on Au(1 1 1), M. Tadjeddine and J.P. Flament 265 (2001) 27
Lie algebraic description of the rotational spectra of linear triatomic molecules: application to CS_2, Q. Meng, D. Guan and S. Ding 265 (2001) 113
The vibrational energy pattern in propyne ($^{12}CH_3^{12}C_2H$), M.I. El Idrissi, J. Liévin, M. Herman, A. Campargue and G. Graner 265 (2001) 273

Electronic structure and states
Excited electronic states of CO adsorbed on platinum, R.J. Buenker, H.-P. Liebermann and J.L. Whitten 265 (2001) 1
Empty levels probed by XAS and ETS in cyclic polymethylene sulfides $(CH_2)_nS$, $n = 2, 3, 4, 5$, C. Dezarnaud-Dandine, F. Bournel, C. Mangeney, M. Tronc, A. Modelli and D. Jones 265 (2001) 105
Spectral broadening and its effect in Stark spectra of carotenoids, S. Krawczyk and D. Olszówka 265 (2001) 335

Electric and magnetic properties
A comparison of aqueous solvent models used in the calculation of the Raman and ROA spectra of L-alanine, K.J. Jalkanen, R.M. Nieminen, K. Frimand, J. Bohr, H. Bohr, R.C. Wade, E. Tajkhorshid and S. Suhai 265 (2001) 125
Photoswitching of the magnetic properties of one-dimensional π-electron systems, F. Dietz and N. Tyutyulkov 265 (2001) 165
A new method for assessing similarities among atoms in molecules, J. Martí 265 (2001) 263

Optical activity
A comparison of aqueous solvent models used in the calculation of the Raman and ROA spectra of L-alanine, K.J. Jalkanen, R.M. Nieminen, K. Frimand, J. Bohr, H. Bohr, R.C. Wade, E. Tajkhorshid and S. Suhai 265 (2001) 125

Molecular interactions
A new formalism for molecular dynamics in internal coordinates, S.-H. Lee, K. Palmo and S. Krimm 265 (2001) 63
Quasirelativistic valence ab initio calculation of the potential curves for the Zn–rare gas van der Waals molecules, E. Czuchaj, M. Krośnicki and H. Stoll 265 (2001) 291
Nonadditivity of interaction in $Li(NH_3)_n$ and $Li(NH_3)_n^+$ ($n = 1$–4) clusters, K. Mierzwicki and Z. Latajka 265 (2001) 301
The CO_2 complexes with HOO and HO in argon matrices, T. Svensson, B. Nelander and G. Karlström 265 (2001) 323

Spectral bandshapes and intensities
Spectral broadening and its effect in Stark spectra of carotenoids, S. Krawczyk and D. Olszówka 265 (2001) 335

Coupling of electronic and nuclear motion
Chemistry of vibronic coupling. Part 1: How to maximize vibronic coupling constants in a diabatic harmonic potential model?, W. Grochala, R. Konecny and R. Hoffmann 265 (2001) 153

Energy transfer processes
Collisional survival of antiprotonic helium atoms, S. Sauge and P. Valiron 265 (2001) 47

Molecular photophysical processes
Excited-state double-proton transfer of pyrimidines mediated by hydrogen-bonded complexes, M.A. El-Kemary, H.S. El-Gezawy, H.Y. El-Baradie and R.M. Issa 265 (2001) 233
Kinetic study of the forward and backward electron transfer between *N,N,N′,N′*-tetramethylbenzidine and CH_2Cl_2 in solid argon leading to a photoequilibrium, A. Langenscheidt, H. Meyer and A. Schweig 265 (2001) 349

Photochemistry
Thermalization of low energy electrons in liquid methylcyclohexane studied by the photoassisted ion pair separation technique, L.V. Lukin and A.A. Balakin 265 (2001) 87
Photoswitching of the magnetic properties of one-dimensional π-electron systems, F. Dietz and N. Tyutyulkov 265 (2001) 165

Intramolecular dynamics
The vibrational energy pattern in propyne ($^{12}CH_3^{12}C_2H$), M.I. El Idrissi, J. Liévin, M. Herman, A. Campargue and G. Graner 265 (2001) 273

-protein motion
A new formalism for molecular dynamics in internal coordinates, S.-H. Lee, K. Palmo and S. Krimm 265 (2001) 63

Multiphoton phenomena
Absolute cross-sections for the nonresonant multi-photon ionization of toluene and xylene in the gas phase, C. Walther, A. Herlert, J.I. Kim, F.J. Scherbaum, L. Schweikhard and M. Vogel 265 (2001) 243

Reactions (incl. dissociation)
Computational study of the thermal reaction rate between $S^+(^4S)$ and acetylene, M. Aschi and A. Largo 265 (2001) 251

-collisional
Collisional survival of antiprotonic helium atoms, S. Sauge and P. Valiron 265 (2001) 47

-condensed phase
Thermalization of low energy electrons in liquid methylcyclohexane studied by the photoassisted ion pair separation technique, L.V. Lukin and A.A. Balakin 265 (2001) 87
Kinetic study of the forward and backward electron transfer between *N,N,N′,N′*-tetramethylbenzidine and CH_2Cl_2 in solid argon leading to a photoequilibrium, A. Langenscheidt, H. Meyer and A. Schweig 265 (2001) 349

Electron transfer
Chemistry of vibronic coupling. Part 1: How to maximize vibronic coupling constants in a diabatic harmonic potential model?, W. Grochala, R. Konecny and R. Hoffmann 265 (2001) 153
Kinetic study of the forward and backward electron transfer between *N,N,N′,N′*-tetramethylbenzidine and CH_2Cl_2 in solid argon leading to a photoequilibrium, A. Langenscheidt, H. Meyer and A. Schweig 265 (2001) 349

Proton and hydrogen atom transfer
Study of the N–H···O=C proton transfer reaction in aqueous solution using classical free energy curves, S. Tolosa Arroyo, J.A. Sansón Martín and A. Hidalgo García 265 (2001) 207
Excited-state double-proton transfer of pyrimidines mediated by hydrogen-bonded complexes, M.A. El-Kemary, H.S. El-Gezawy, H.Y. El-Baradie and R.M. Issa 265 (2001) 233

Ionization (incl. Rydberg states)
Absolute cross-sections for the nonresonant multi-photon ionization of toluene and xylene in the gas phase, C. Walther, A. Herlert, J.I. Kim, F.J. Scherbaum, L. Schweikhard and M. Vogel 265 (2001) 243

Surface chemical physics

-adsorption

Excited electronic states of CO adsorbed on platinum, R.J. Buenker, H.-P. Liebermann and J.L. Whitten 265 (2001) 1

-adsorbate structure

Ab initio interpretation of sum frequency generation spectra of 4-cyanopyridine adsorbed on Au(1 1 1), M. Tadjeddine and J.P. Flament 265 (2001) 27

Electronic process in gases

Empty levels probed by XAS and ETS in cyclic polymethylene sulfides $(CH_2)_nS$, $n = 2, 3, 4, 5$, C. Dezarnaud-Dandine, F. Bournel, C. Mangeney, M. Tronc, A. Modelli and D. Jones 265 (2001) 105

Thermodynamic and transport properties

Heat capacity and entropy of an equilibrium liquid from T_g to 0 K, and examining the conjectures of an underlying thermodynamic transition, G.P. Johari 265 (2001) 217

Molecular self-assembly and -organization

Molecular simulation of a phase separation in a non-primitive electrolyte solution, L. Degrève, A.C. Borin, F.M. Mazzé and A.L.G. Rodrigues 265 (2001) 193
